

SARIÇAM

ARMS DEFENCE INDUSTRY

2025
PISTOL CATALOG

The S-19 isn't just another clone. While it does accept most G19 parts including 15 round magazines, the S19 is based on the ultra reliable generation 4 series. The lightning cut slide allows for faster cycling and less felt recoil. The 4.25 inch barrel provides the perfect balance of shootability and concealment. It features factory STEEL 3 dot sights for fast target acquisition.

The polymer frame is comfortable. It features finger grooves for a good fit to the hand. The front strap and back strap are textured for maximum recoil control. An extended beavertail and undercut trigger guard allow a higher grip for minimal recoil and faster follow up shots.

MODEL 01

The S-19 is Sariçam's first entry into the handgun market. Its light weight and compact size make it an ideal candidate for self protection. Its double stack magazine holds 15 rounds making it high on firepower while the lightning cut slide and polymer frame keep off any unnecessary ounces. The frame has 2 accessory slots so it's ready to accept your favorite light or laser. Optics ready models will also be available to directly mount your optic without the need for adapter plates.

ABOUT US

We are assertive that in order to grow, develop and compete with competitors in the world market, it is necessary not only to produce, but also to produce with higher quality and to deliver on time, and with this understanding, Sariçam Arms has made a name for itself with its innovations in the defense industry.

Its corporate understanding, which aims to respond one step ahead of customers' demands, has led Sariçam Arms to open up not only to Turkey but to the whole world and has started to exist in the world market.
